Press Release

Gaithersburg, MD, February 2018: Optical Scientific Inc. (OSI) announces two more FAA certified AWOS-AV systems being installed at private helipads, one in South Lincoln, VT (VT88) and the second in Stratford, NH (NH08). The AWOS equipment will be used to support IFR approaches at both locations. OSi now has over a 150 AWOS installed worldwide.

The OSI AWOS-AV is the best value FAA certified aviation weather system offering high performance at affordable cost. The system may be configured for all size airports ranging from small landing strips to international airports. The AWOS-AV is targeted for airport and helipad operators on limited budgets. AWOS-AV systems are often installed on Hospital roof tops making time critical transportation of patient to emergency room as efficient as possible. More OSi AWOS are installed in support of hospital Emergency Medical Service (EMS) operations than any other AWOS manufacturer.
